

设计思维

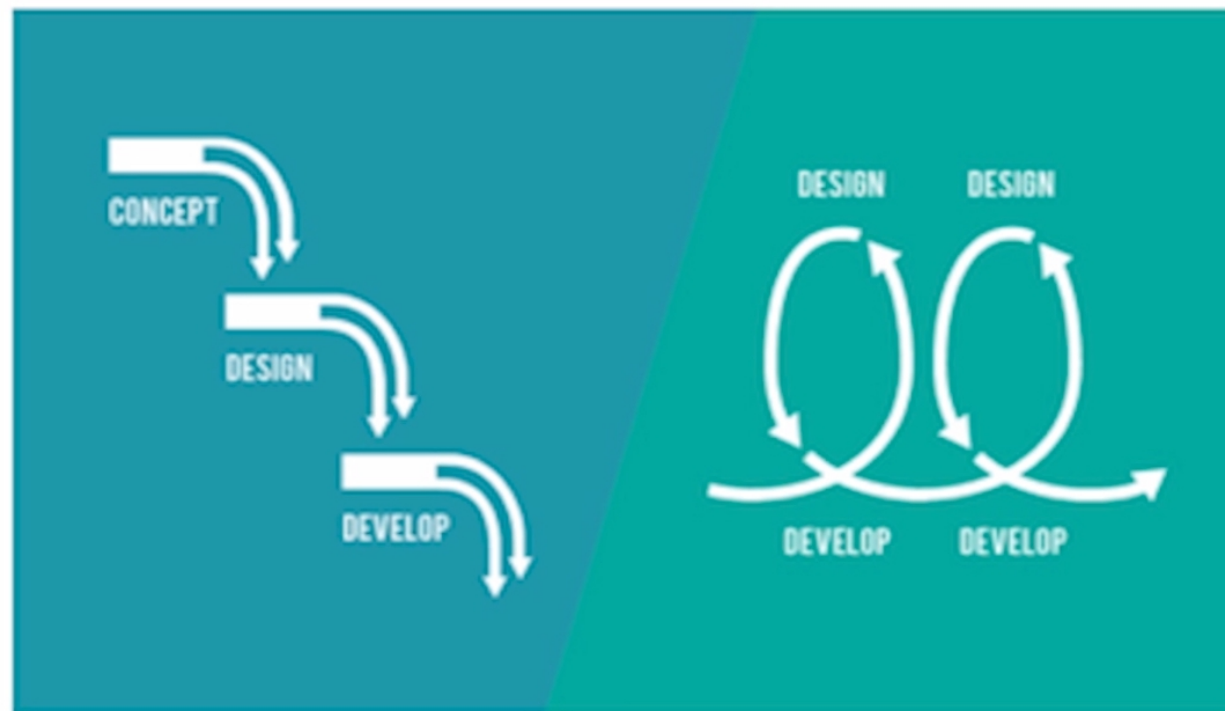

Double Diamond DESIGN PROCESS

Prototype
Greek word for

primitive form

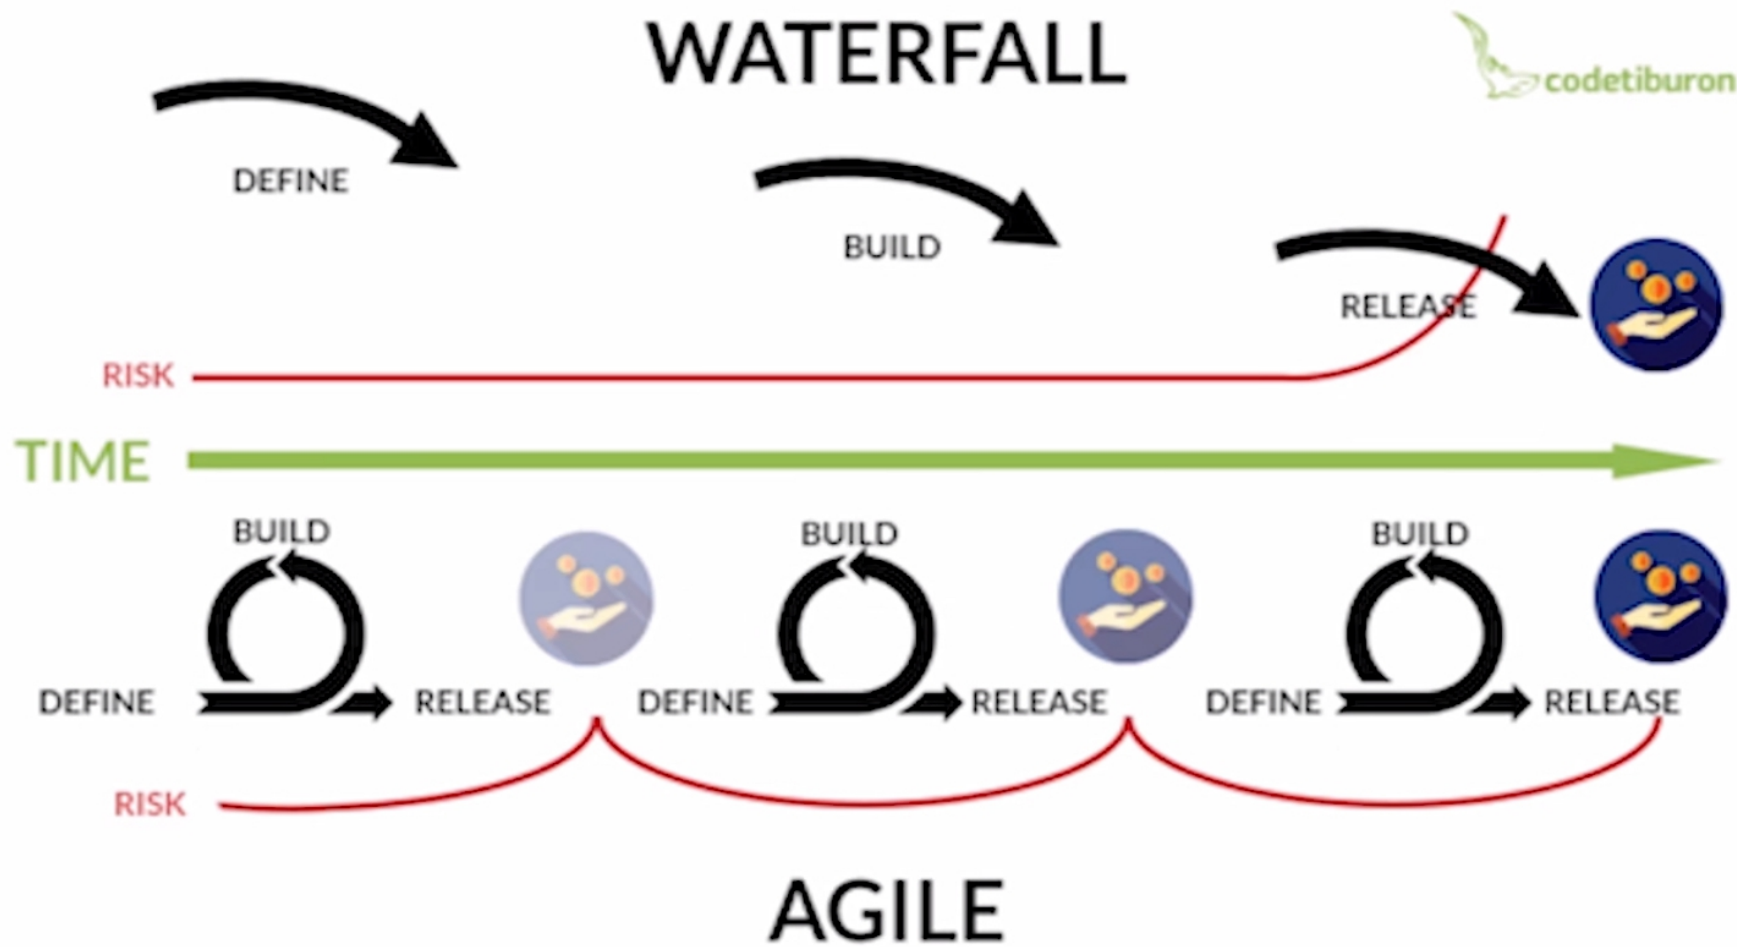

瀑布开发

敏捷开发

make a real change

频繁的测试和修改是敏捷设计的首要原则。

敏捷设计：将用户纳入团队

- 原型设计是一种用原型形式来模拟真实产品、服务和商业模式的办法。
- 原型设计是解决问题的方法。它是一种文化，一种语言。你可以为任何东西制作原型——一种新产品、新服务或者一项特别的营销活动。重要的是把工作向前推进，实现你想要达成的目标的一部分。不要浪费时间。

Bringing new ideas to life is an essential part of what we do.
The first versions are usually rough. They're early proofs of
concepts, ways of helping us explore, learn, and think.
Usually, they're far from pretty, and they may never work.
They're prototypes — not finished products.

— IDEO

2001年专注开发微创手术技术的捷锐士公司与 IDEO 合作开发了一种用于鼻腔组织手术的新器械。

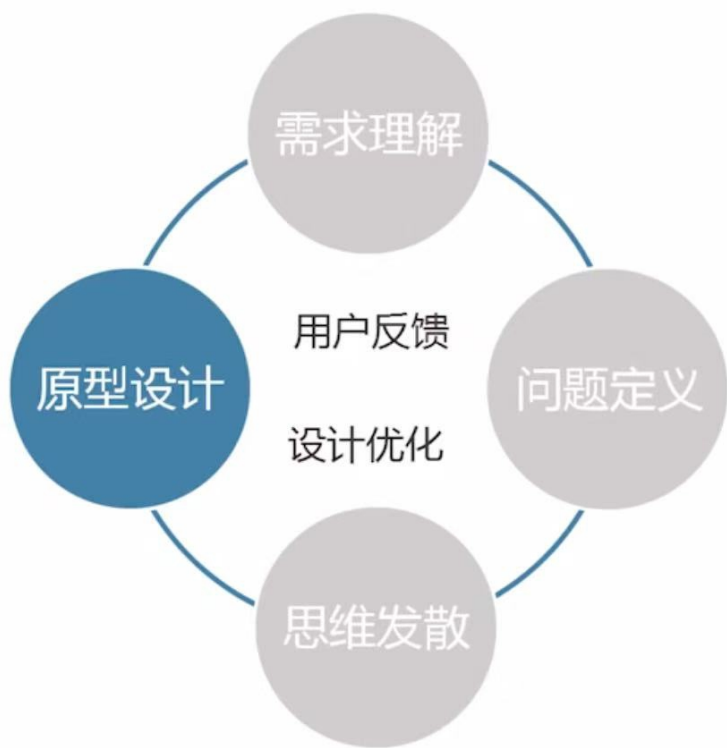

IDEO通过快速搭建模型，推进想法前进，实现高效沟通

原型的作用

- 展示设计概念和操作流程 直观，方便交流与沟通
- 测试产品的可用性 及时发现问题，节约开发成本

Alexander Grotz 六原则

- 不完美：专注于预定功能
- 不要爱上原型：“尴尬理论”
- 拓展边界：尝试超越现有的边界（技术、可用性等）
- 适当刺激
- 打破规则

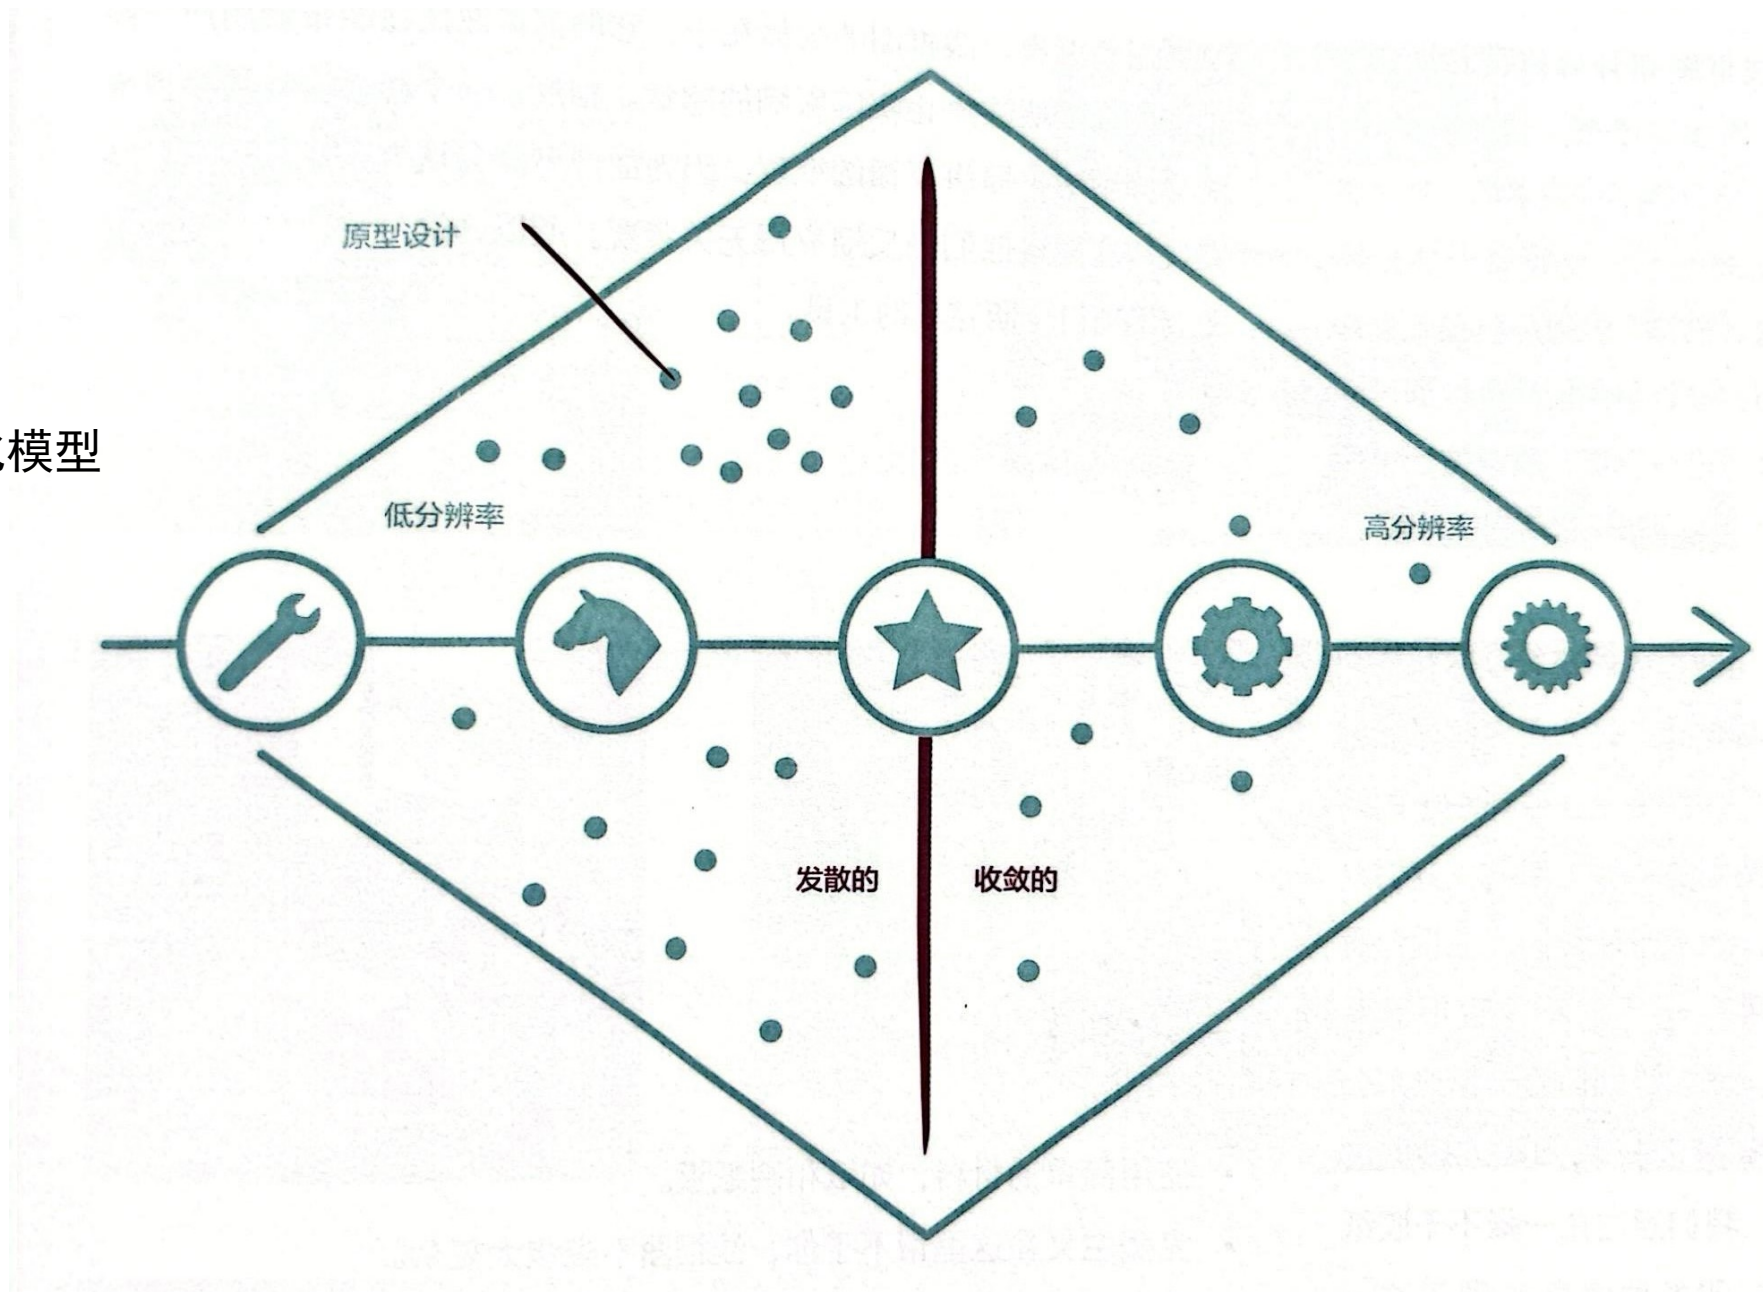

成本低 易于沟通

Main Function #1 For design university students

This function is about how to find an internship, and how to send works online, this process can let students and companies communicate and discuss directly.

WIREFRAME

The purpose of this test is to test the logic of the website process and the usability of the framework.

Testing results

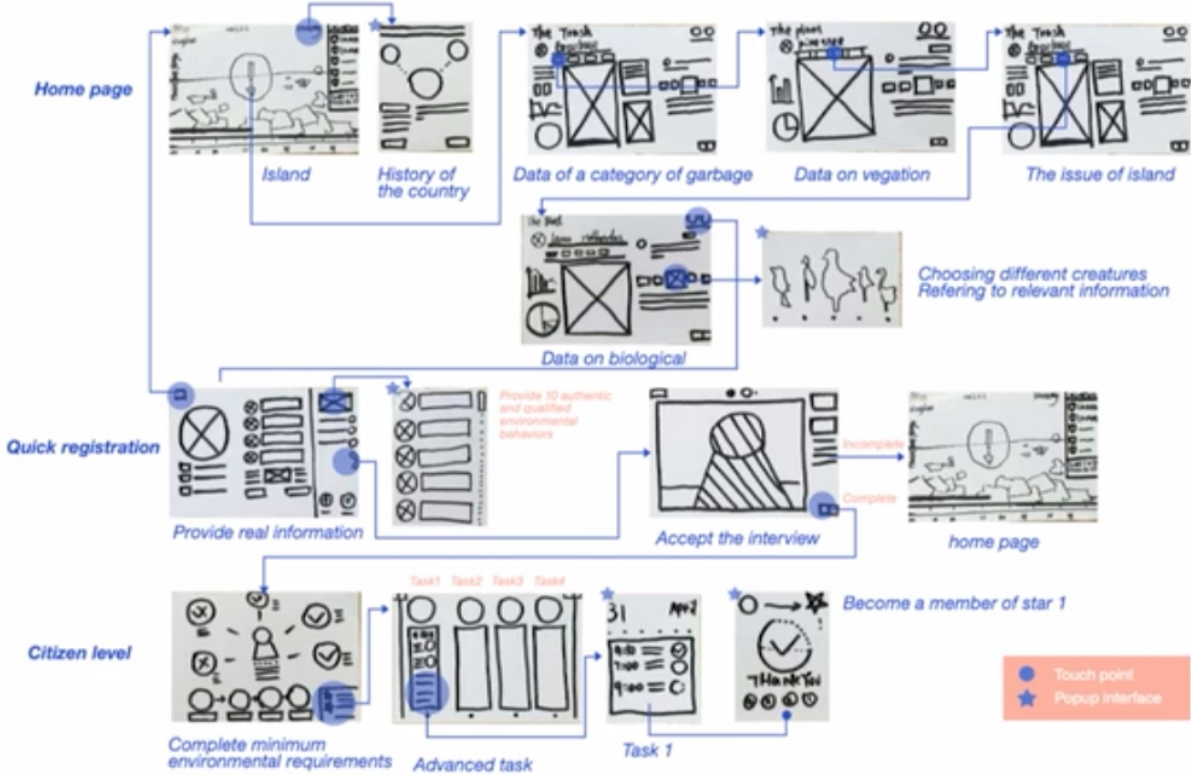

When the frame diagram is tested, the tester finds that the interface jump is not very smooth, and the real-time

Prototype testing

There are two people accepted were invited to participate in this test.

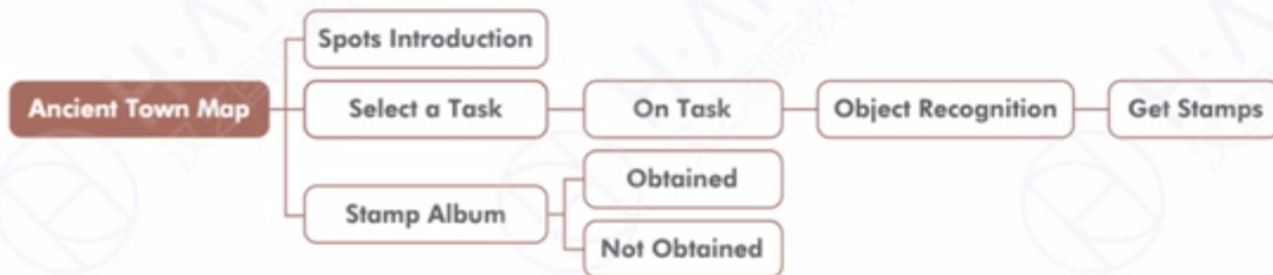

DEVELOPMENT

视频式MVP

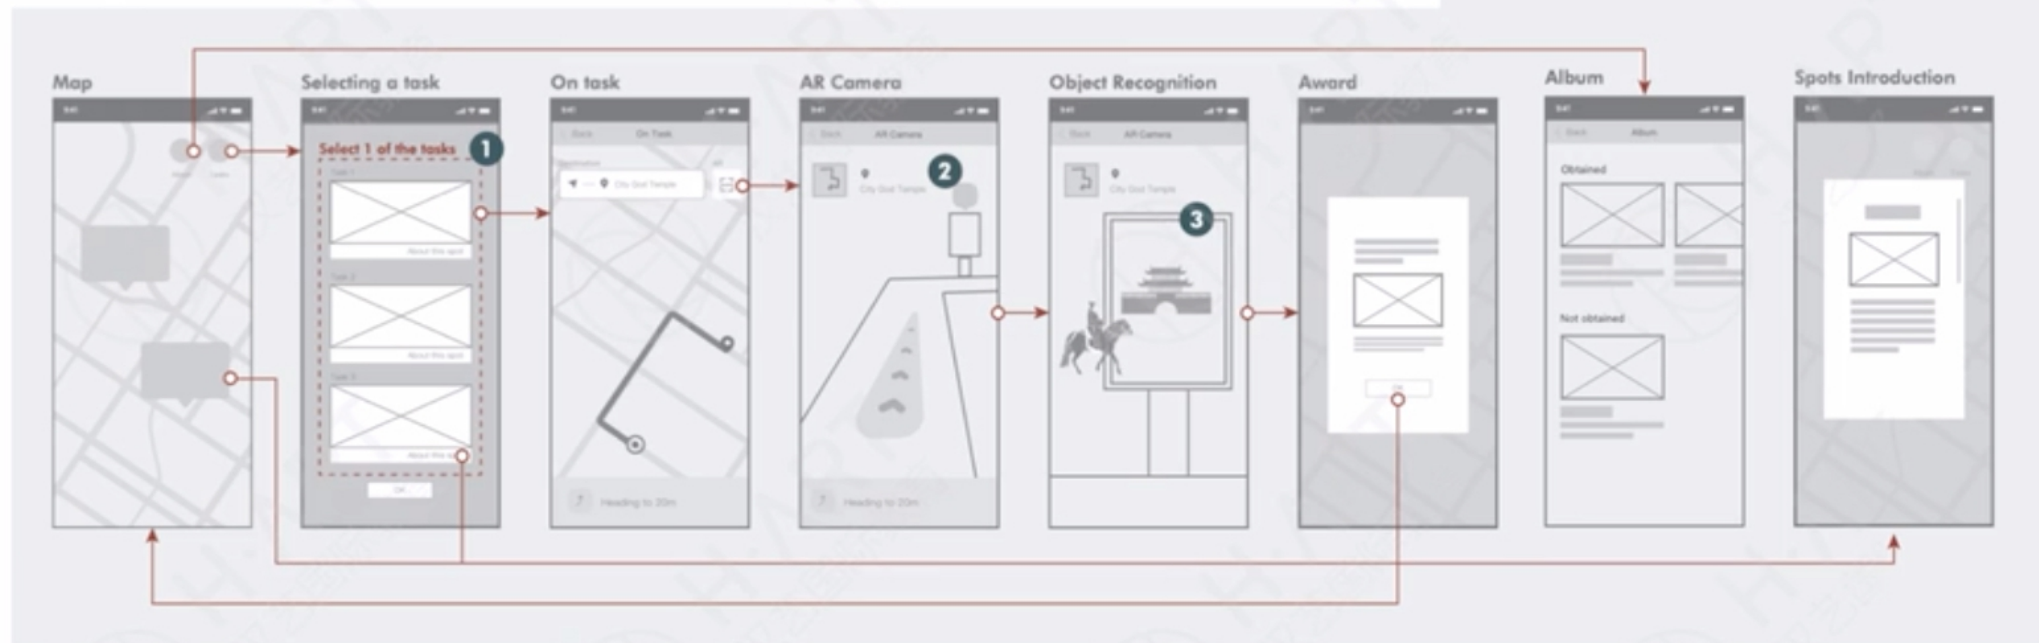

Information Architecture

- 1 When it is first used, the app pops up this interface to help the user complete the first task. After completion, the user can select a new task through the "Task" button on the "Map" page.
- 2 When approaching the task spot, a window will pop up in the screen to remind the user of the woodcarving board that needs to be recognized.
- 3 When the distance is close enough, the AR Camera will automatically recognize the pattern on the woodcarving board and demonstrate the scene of the postman arriving at the station in the Qing Dynasty.

PROTOTYPE

This is a prototype of the first experience of this product, for the possibility in further test, I did it rough but clear, try not to limit user's thoughts in a box.

USABILITY TEST

I invited a professional UX designer and a student helping me with the usability test, and explained design concept to them.

Suggestion

'For someone who use it first time, **guide** should be more explicit.'

'The **layout of task list** is a bit of weird scrolling down.'

'I prefer to **sign up** with my social media account.'

'I do check the **weekly schedule** a lot, it's **not convinient** for me having to check it in the seeting page.'

USABILITY TESTING

Manufacturing Process

First Test

3 people were asked to test whether the APP is reasonable in terms of the operation. Perform tasks for users with specific background.

Task:

1. Signing up on the app
2. Viewing the current duration
3. Stop APP alerts
4. Viewing history

Test Result

Li Yitan

She failed to complete the registration, and viewing history

Cong Mingyi

She failed to complete viewing current duration, and viewing history

Li Yanqing

She failed to complete viewing current duration, and viewing history

Wireframe

4↑Task

Concept Development version 2

优化后的版本

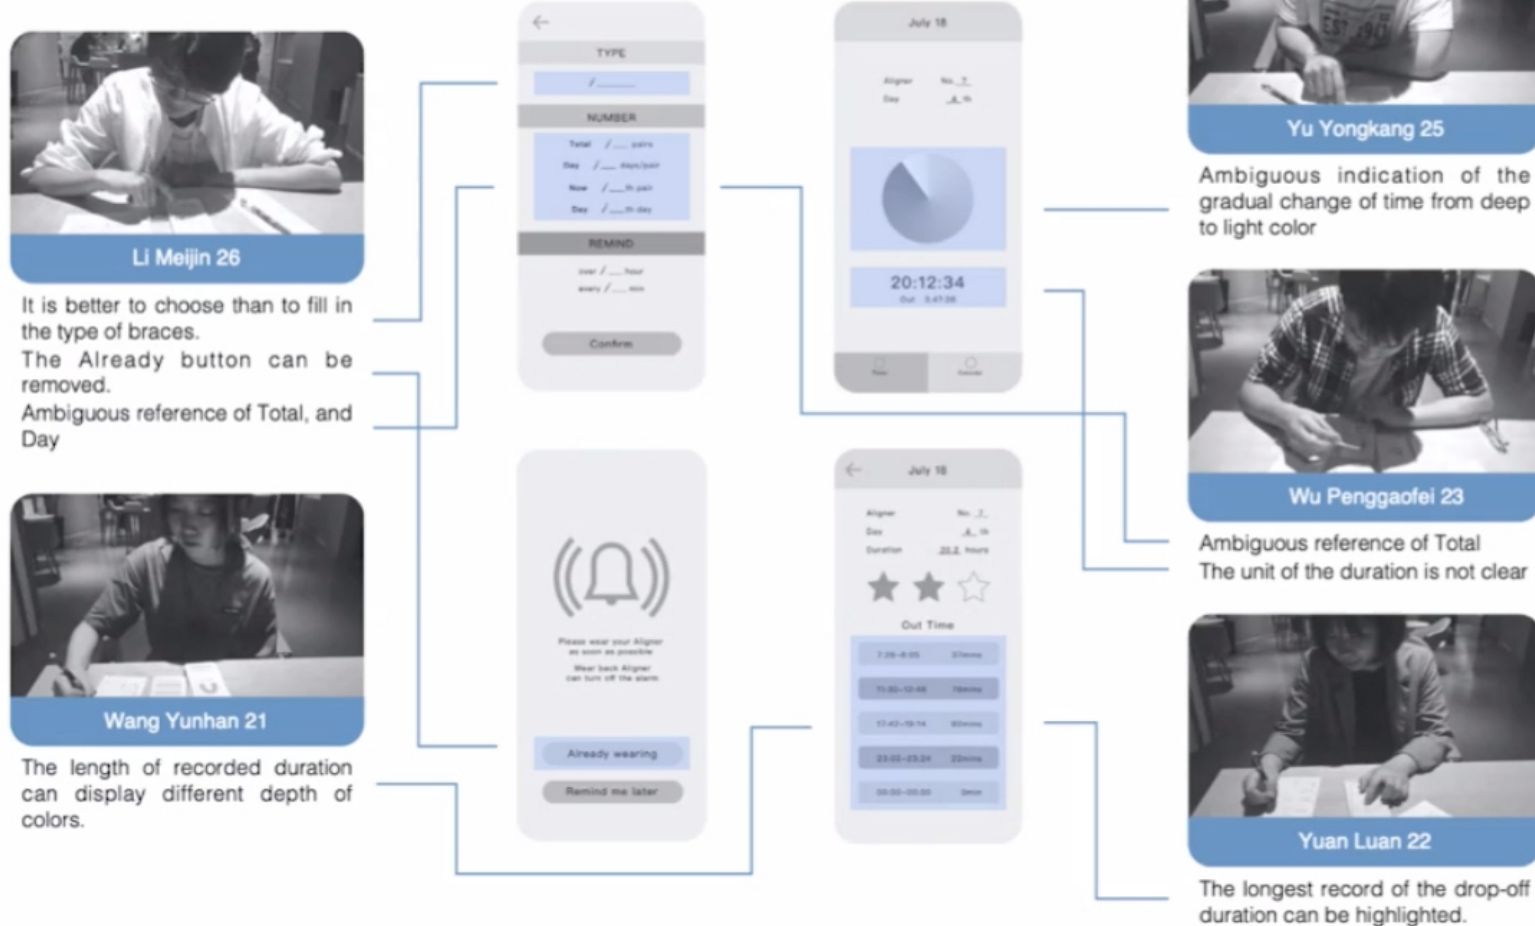

- ① Signing up on the APP
- ② Viewing the current duration.
- ③ Stop a PP alerts
- ④ Viewing history.

USABILITY TESTING

Second Test

Test process and results

A total of 5 people were asked to conduct the second test by repeating the content of the first experiment.

Third Test

Another two people were asked to do the test. On the basis of the original test, the selection of the pop-up window content and the duration of drop-off are added.

Wu Xinyue

Tan Qi

The testing process was smooth and in line with expectations.
